PROFESSIONAL EXPERIENCE

IT Repair and Support Technician

Self-employed | 2020 – 2022

- Repair, maintenance and upgrade of desktop computers and laptops.
- Diagnosis of hardware and software issues.
- Problem-solving and customer service skills.
- Operating system installation and configuration.

PROJECTS

E-commerce React

E-commerce web application built with React (frontend only).
Styling implemented with Chakra UI.
Firebase and DummyJSON used to simulate a database and product data.

Form Digitizer with AI

Automation tool developed in Python to massively digitize paper forms (handwritten and checkbox-based).
Uses Google's Gemini vision model to extract and process information.

Basic Authentication API

Backend built with Express focused on user and session management. Implements basic Auth and JWT for authentication and authorization.
